

Yehia Alsaeed

AI / Machine Learning Engineer

Cairo, Egypt | yehias3eed11@gmail.com

linkedin.com/in/yehia-alsaeed | github.com/Yehia-Alsaeed

Summary

Computer Science (Artificial Intelligence) graduate and AI/ML engineer who builds practical AI systems end-to-end, from large language models and multi-agent systems to computer vision and deployed full-stack products. Strong across the full workflow: data preparation, modeling, evaluation with real metrics, and shipping.

Education

BSc (Hons) Informatics and Computer Science, Artificial Intelligence Major

The British University in Egypt (BUE), Cairo | Graduated 2026

Relevant coursework: Artificial Intelligence, Machine Learning, Data Science, Data Structures and Algorithms, Database Management, Software Engineering.

Experience

Intern, Dell Technologies Summer Academy 2025 | Aug - Sep | 190 hours

- Completed a 190-hour program covering ISM, AI, automation, data science, software engineering, project management, and leadership.
- Co-built and pitched a four-module AI career platform to senior leaders, prototyping a job-forecasting dashboard, short-form video hub, career assessment with roadmaps, and an AI interview assistant.
- Worked in Agile with daily standups, sprint planning, peer reviews, and demo presentations.
- Job-shadowed Presales, Solution Architecture, and Project Management to understand the full delivery lifecycle.

Freelance Shopify Web Developer | Cairo, Egypt | 2025 - Present

- Designed, built, and launched complete Shopify stores optimized for conversion and SEO, customized with Liquid, HTML, CSS, and JavaScript.

Projects (the rest are on GitHub)

SkillBridge AI Interviewer (Graduation Project) | React, FastAPI, PyTorch, OpenAI, MediaPipe

- Developed an AI mock-interview coach that scores webcam interviews on five traits using speech transcription, eye-contact estimation, and LLM scoring.
- Ran a multimodal ML study on First Impressions V2, comparing XGBoost baselines against wav2vec2, CLIP, and MPNet embeddings.

Llama QLoRA Education QA | PyTorch, Hugging Face (Transformers, TRL, PEFT)

- Fine-tuned Llama 3.x with QLoRA for educational QA, improving Exact Match from 0.00 to 0.66.
- Built the full pipeline: data prep, instruction formatting, fine-tuning, and Exact Match / ROUGE evaluation.

AI Study Planner Agents | CrewAI, GPT-4o-mini, sentence-transformers

- Designed a multi-agent LLM system (profiler, generator, critic, optimizer) that generates and refines study schedules with tool-augmented reasoning.
- Added semantic difficulty classification and a TensorBoard evaluation across model temperatures.

Oxford Pet Binary Segmentation | PyTorch, timm

- Benchmarked FCN-ResNet18, SegNet-VGG16, and HRNet-W18 on mIoU, Dice, and inference speed.
- Selected HRNet-W18 as the best accuracy/latency trade-off (0.93 mIoU, 0.06s per image).

Prestige Motors Showroom | React, TypeScript, Node.js, Express, MongoDB, Vercel

- Built and deployed a full-stack MERN car-showroom platform with reservations, a used-car offer flow, and a role-based admin workflow.
- Implemented JWT auth with role guards, API rate limiting, and a Cloudinary image pipeline.

Skills

- **Languages:** Python, C++, Java, C#, TypeScript/JavaScript, SQL
- **AI/ML:** PyTorch, deep learning, computer vision, NLP, LLM fine-tuning (QLoRA, PEFT), multi-agent systems (CrewAI), Hugging Face, OpenAI APIs, scikit-learn
- **Web/Tools:** React, Node.js, FastAPI, Express, MongoDB, REST APIs, Git
